I made all of Tina's and Carolyn's edits and sent it to Tina. Both she and Angeles have signed the letter and it will go out today. We'll try to schedule a conference call and then determine if we need to go to formal dispute.

A couple comments on the letter – I understand this is to go out today and the dispute statement goes out when the don't go along with our added additions to the work plan?

I responded to Tina's questions. In responding to the question about specific benzene concentrations, I found some "baseline" data they sent us a year ago. You will see several wells with benzene in the thousands of ug/l, and as much as 270,000 ug/l in LSZ 51 a year ago. Its hard to pick one location representative of the site.

I accepted all of Tina's edits, but there are a couple of questions raised in the margins that need to be answered and incorporated into the document. Carolyn, please take a look and provide the info. Thanks.

Loren
